THE GAZETTE OFFICE-NOTICE

Frequent inquiries for us at our office the Centre render it necessary that we should state that our Central Office in Bloomfield is simply or chiefly only a Pus. LICATION OFFICE, regularly open on Fridays; which is our publication day. The papers are distributed from that office on that day through the mail, or otherwise, to aubscribers, and to news dealers. We visit that office daily to get such communications and advertisements as may be placed in our office box, but our editorial room is at our residence on Washington street, where we may generally be found in our Library before nine A. M., and after 4 P. M. and will be happy to see our friends and those who have any GAZETTE business with us. Letters by post or through our office box reach us twice every day.

A FEW THOUGHTS ON POLITICAL MATTERS IV.

TENURE OF OFFICE. The versatility of the American people their general adaptibility to whatever conditions; their willingness to enter upon new spheres of life and unaccustomed vocations; and the readiness with which

they assume a new role of trust and responsibility; have not only astonished the ap athetic and stolid peoples of Europe and the East, but have also excited the admiration and aroused the ambition of their philosophers and statesman. There is no doubt that the example of our universal genius and the presence of the cosmopolitan and communicative yankee in every part of the world, have exerted a powerful influence for the regeneration of the effete nations of the Old World, They are ness of habit, persistence of purpose, augur well for the progress of liberal ideas other lands.

Without stopping to contrast with others our own social condition, unequalled material advantages and universal freedom etc., we proceed to consider the question named at the head of this article—the

Universal elegibility to citizenship here with its attendent suffrage, interests every body in all sublic measures and political. questions; and, as a consequence, begets aspiration for office in the breasts of threequarters of the men throughout the country. All of them deem themselves qualified, of course, and are disappointed if their abilities and their merits, and their rewarded by appointment. Expediency for influence sake, availability, for the votes he will command, are all-prevailing reasons why this or that man should receive executive favor or the suffrage of his Occasionally a choice man gets in-

In this country, no civil officers, but the Judges of our highest courts, are installed for an undefined period; and very few are retained in office beyond the period for course some are re-elected, but many are or before they have well mastered the dif ficulties of their position and learned by experience how to perform their duties and and efficiency. They are removed to make room for others, who are to go through the same course of expensive training, wasteful extravagance and ignorant inefficiency.

When a public officer has " learned the ropes" and how to handle them himself: and knows when and what to direct his supordinates to do; and has proved his industry, zeal and fidelity; his masters, whether they be the President. and Senate, the civil executive, or the suffrage constituency, should have the wisdom and independance to return such an one to his functions, and to continue him there as long as he is manifestly entitled to confidence and approval.

This, it seems to us, should apply to all offices, the highest as well as the lowest, whatever their responsibility. Indeed, the more elevated or difficult the position, the more valuable the trust, the more comprehensive the functions, the more weighty the responsibility it involves, the more unwise and unreasonable would it be to sacrifice the great advantage the occupant has gained by each new day's experience. The country mannot afford to lose this accumitlated knowledge and this dearly acquired facility in the oversight and management of its most important affairs.

#### NEWARK CITY ELECTION. NOT OMINOUS.

The result of Tuesday's election in th City of Newark, is known to our readers Never before, we understand, did an election in that city pass off more quietly. There was hardly any excitement visible, and although each Ward had its complement of ticket disiributers, but few were taken from their hands. Most of the voters came to the polls with their tickets prepared, and seldom has there been such scratching done as on this occasion. Peo ple seemed to ignore party ties altogether, and made their selections from the re spective tickets to suit themselves.

The Democratic press of the City are

We have heretofore mentioned, as among the desirable charges already contemplated and talked of in the community, the extension of Liberty street cast and west Center, and the widening of Central Ave. on the west side from Liberty street to Bloomfield Avenue. Many others in different parts of the town may be equally proper. > SAN FRANCISCO, Sept. 22, 1874. THE MORMONS.

Whatever may be said of the Mormone or their creed, I do not think they can justly be accused of the sin of hz ness. There are but few drones in the busy hive. Their neat cottages, their carefully cultivated fields, their orchards groaning under their weight of fruit, the well arranged and laid out towns and cities, with commodious public buildings, all show a development of energy and enterprise, and a plan of action that has been carried into the performance of the smallest details,
